na = not available. P = Preliminary. 1/ Cranberries paid for by processors and lost because of dehydration and berry breakdown after delivery. 2/ 1980-86 prices represent equivalent returns at first delivery point, screened basis of utilized production. Beginning 1987, prices are a weighted average of co-op and independent sales. Co-op prices represent pool proceeds less returns for processing non-cranberry products, capital stock dividends, capital stock retains, and other retains. 3/ 1 barrel = 100 pounds.
