**Report Highlights:**

On December 26, the National Health and Family Planning Commission of the People's Republic of China released the national food safety standard of Pathogen Limits for Food. Draft of the standard was notified to the WTO as SPS N CHN 354. The Standard will be implemented on July 1, 2014.

This report provides an unofficial translation of the Standard.

**General Information:**

**National Food Safety Standard  
Pathogen Limits for Food**

1. Scope

This standard provides the indexes for pathogen in foods, limits and testing methods.

This standard applies to pre-packaged foods.

This standard does not apply to canned foods.

2. Principles for implementing the standard

2.1 With or without pathogen limits, the food producers, processors and traders shall take control measures to reduce the pathogen level in foods and the possibility of causing risks.

2.2 After taking samples according to provisions of the GB4789.1, the sample shall be tested according to the testing methods in the Table 1.

3. Index Requirements

Table 1 shall be referred to for the pathogen limits for food.

**Table 1 Pathogen Limits for Food**

Food Category	Pathogen	Sampling Method and Limits (each sample is /25g or /25mL if not specified)				Testing method	Note
		n	c	m	M		
<b>Meat products</b>  Processed meat products Ready-to-eat raw meat products	Salmonella	5	0	0	-	GB4789.4	-
